GE Energy invests Rs 257 cr in Gati's Sikkim hydel project

Our Bureau

Hyderabad, July 30

GE Energy Financial Services India has invested Rs 257 crore in the Sikkim hydro-power project developed by Gati Ltd.

The investment was made through a share subscription agreement, according to Gati.

Gati Infrastructure Pvt Ltd, the energy initiative of Mahendra Agarwal, Founder and CEO of Gati Ltd, has developed the 110-megawatt Chuzachen hydro-electric project in east Sikkim to harness the water flow from the rivers Rangpo and Rongli. The project was commissioned in May.

The run-of-river hydel project has turbines and genera-

tors from Alstom India Ltd. The project built at a cost of Rs 1,188 crore is the first one of such size under private ownership in the North East. IDFC is the lead financier with a loan at the project level. Capital Fortunes Pvt Ltd, Hyderabad, are the advisors and sole arrangers.

Mahendra Agarwal said, "Sikkim is a growing economy in the North-East with average rainfall higher than in several other Himalayan States. With glacial melt and the perennial rivers, Sikkim has a peak potential capacity of 8,000 megawatts of hydro-electric power."

Gati Infra sets up ₹ 1,118-cr hydro power project in Sikkim

BS REPORTER

Hyderabad, 30 July

Gati Infrastructure Private Limited (GIPL), a Hyderabad-based company focused on generating non-carbon power, has commissioned a 110-Mw hydro-electric power project in the north-eastern state of Sikkim.

The project, built at a cost of Rs 1,118 crore, will harness the water flow from Rangpo and Rongli rivers in Sikkim through run-of-river design with turbines and generators supplied by Alstom India Limited. While IDFC was the lead financier with a loan at the project level, Hyderabad-based Capital Fortunes was the adviser and sole arranger in respect of this transaction.

GE Energy Financial Services India has invested Rs 257 crore in the project through a share subscription agreement, GIPL said in a press release on Tuesday. GIPL is an energy initiative of Mahendra Agarwal, founder and CEO of Hyderabad-based express distribution company Gati Limited.

"Sikkim is a growing economy in the northeast with an average rainfall higher than in several other Himalayan states. With glacial melt and the perennial rivers, Sikkim has a peak potential capacity of 8,000 Mw of hydro-electric power," Agarwal said.

Gati enters hydro-power sector

Special Correspondent

HYDERABAD: Express distribution and supply chain solution provider, Gati, has forayed into the hydro-power generation segment announcing its hydel project in Sikkim.

The 110 MW project, handled by Gati's Infrastructure arm, has been designed to harness water from Rangpo and Rongli river in a run-of-river design with turbines and generators supplied by Alstom India.

Lending firm GE Energy

The project, built at a cost of Rs. 1,188 crore, is among the first in the north east under private ownership

Financial Services India has invested Rs.257 crore in the project through a share subscription agreement.

According to Gati Infrastructure Pvt. Limited

Mahendra Agarwal

promoter Mahendra Agarwal, the project was built at a cost of Rs.1,188 crore was among the first such projects in north-east under private ownership.

Commissioned in May this year, the hydel project, involving IDFC as the lead financier, has been operating steadily.

He said Sikkim was a growing economy in the north-eastern part of the country with average rainfall higher than several other Himalayan States. Coupled with the glacial melt and perennial rivers, the State offered a peak potential capacity of 8,000 MW in hydro power segment, which could meet the growing electricity shortage across the country.

Gati Infra builds power plant in Sikkim

Hyderabad: Gati Infrastructure Private Limited has set up its first hydro-power project in Sikkim with an investment of ₹1,188 crore. This 110-MW Chuzachen hydro-electric project located in East Sikkim harnesses the water flow from the rivers, Rangpo and Rongli. IDFC is the lead financier for the project in which GE Energy Financial Services India has also invested ₹257 crore. Built with run-of-river design, the plant used turbines and generators sourced from Alstom India Limited. "Sikkim is a growing economy in the North East with average rainfall higher than in several other Himalayan States. With glacial melt and the perennial rivers, Sikkim has a peak potential capacity of 8,000 megawatts of hydro-electric power," say Mahendra Agarwal, promoter of Gati Infrastructure.

GE Energy invests \$43M in Gati Infra for hydro–power project

The project, built at a cost of Rs 1,188 crore, is the first one of this magnitude under private ownership

GE Energy Financial Services, an arm of American multinational conglomerate General Electric, has invested Rs 257 crore (\$43.2 million) in Gati Infrastructure Ltd (GIL) through a share subscription agreement for an undisclosed stake.

VCCircle had first reported that GIL raised Rs 257 crore private equity funding from GE Energy Financial Services

Gati Infrastructure, which commissioned its first 110 MW hydro electric power plant in Sikkim last month, has an enterprise value of Rs 1,400 crore with this transaction. The project, built at a cost of Rs 1188 crore, is the first one of this magnitude under private ownership.

IDFC acted as the lead financier with a loan at the project level and Capital Fortunes Pvt Ltd was the advisor and sole arrangers on this transaction.

Gati Infrastructure is owned by Mahendra Agarwal, founder and CEO, and his group firm Amrit Jal Ventures Ltd, an owner of special purpose vehicles (SPVs) with three hydro–electric power projects under construction in Sikkim.

Gati Infrastructure focuses on renewable energy and has a portfolio of solar, hydro and coal projects. The firm is backed by River Valley Hydro Venture Pte Ltd which invested \$6.96 million in the company in 2007 for an undisclosed stake.

Commenting on the location of the project, Agarwal said, "Sikkim is a growing economy in the North East with average rainfall higher than in several other Himalayan states. With glacial melt and the perennial rivers, Sikkim has a peak potential capacity of 8k MW of hydro–electric power."

GE Energy Financial Services provides financial and technological investment in energy infrastructure projects. According to its Website, it has committed more than \$9 billion for wind, solar, biomass, hydro, geothermal and other renewable power projects

GE Energy Financial invests Rs 257 cr in Gati’s Sikkim hydel project

GE Energy Financial Services India has invested Rs 257 crore in the Sikkim hydro-power project developed by the energy initiative of the express and logistics company Gati Limited.

The investment was made through a share subscription agreement.

Gati Infrastructure Private Limited, the energy initiative of Mahendra Agarwal, Founder and CEO of Gati Limited, has developed the 110 megawatt Chuzachen hydro-electric project in East Sikkim to harness the water flow from the rivers Rangpo and Rongli. The project was commissioned in May this year.

The run-of-river hydel project has turbines and generators from Alstom India Ltd . The project built at a cost of Rs 1,188 crore is the first one of such size under private ownership in the north east of India. IDFC is the lead financier with a loan at the project level. Capital Fortunes Private Limited, Hyderabad are the advisors and sole arrangers in respect of this transaction.

Mahendra Agarwal said, "Sikkim is a growing economy in the north east with average rainfall higher than in several other Himalayan States. With glacial melt and the perennial rivers, Sikkim has a peak potential capacity of 8,000 megawatts of hydro-electric power."

Amrit Jal Ventures Private Limited is the holding company for hydel projects under the Gati Infrastructure established to generate power.

This has three special purpose vehicles (SPV) with three hydro-electric power projects under construction in Sikkim. These include 110 megawatt Gati Infrastructure Private Limited, 54 megawatt, Gati Infrastructure Bhasmey Power Pvt Limited and 71 megawatt Gati Infrastructure Sada-Mangder Power Private Limited.

The Group presently has a portfolio of hydro-electric and solar power projects and is looking to further expand its renewable energy portfolio.

GE Energy Invests In Gati's Hydro-Electric Project

Express distribution & Supply chain solution leader, Gati Infrastructure has built a Hydro-Electric Power project in the private sector in Sikkim & GE Energy Financial Services India has invested R257 Cr in the hydro power project through a share subscription agreement as stated in BSE filing.

Capital Fortunes Private Limited are the advisors and sole arrangers in respect of this transaction.

In June, ISL-Gati Express a newly launched coastal services by International shipping and logistics and **Gati Ship** Limited a subsidiary of Gati successfully

completed its maiden voyage in June from Kandla (Gujarat) to Vallarpadam Port (Kerala).

Gati Infrastructure is a subsidiary of Amrit Jal Ventures (AJVL) promoted by Mr. Mahendra Agarwal, Founder and CEO of Gati. GIL had entered into an agreement with the state government of Sikkim to implement three hydro power projects. The first project viz. 110 megawatts (MW) Chuzachen Hydro Project has been commissioned and started producing and selling power.

The 110 megawatt Chuzachen hydro–electric project in East Sikkim harnesses the water flow from the rivers Rangpo and Rongli, in a run of river design, with turbines and generators supplied by Alstom India Ltd. The project built at a cost of R1188 Cr is the first one of this magnitude, under private ownership, in the north east of India. IDFC is the lead financier, with a loan at the project level.

AJVL is implementing two more hydro electric power projects in Sikkim, a 54 MW Bhasmey hydro electric project (under construction) and 71 MW Sada Mangder project.

GE Energy Financial Services & Partners recently completed the acquisition of 30 wind farms in France.

Gati presently has a portfolio of Hydro–electric and solar power projects and is looking to further expand in renewable energy portfolio.

Gati is one of the leading logistics companies in India. It is a pioneer and leader in express distribution and supply chain solutions.

In this segment, a unit of Sembcorp Industries, backed by investor Temasek, is likely to acquire a majority stake in NCC Power Project for R1500 Cr
